

Design speaker set for stands

DS-20

This design speaker combination set is ideally suited for speech and music transmission. It is particularly practicable for central public address systems in underground railway stations, shopping centers or entrance halls. Design is based on our speaker versions DS-2 and DS-3. Extra control of each module provides optimum adjustment of music and speech. Each upper set is equipped with three 130 mm full range systems with high-range cones (4x30W). Each lower set is equipped with two chassis (4x20W). Adjustment of the whole combination set is realized due to stainless steel ball joints.

Typ	DS-20
load rating	200W / 100V
Impedance	50 Ω
Transformer matching	200 / 100 / 50
Sound pressure level (1W/1m)	98dB in each direction
max. Sound pressure level (1m)	108dB in each direction
Frequency range (-10dB)	70-19000 Hz
Transmission angle	360°
Dimensions (mm)	1000x1000x1250 High
Material	Aluminium
weight	ca. 40,0 kg
Color	silver / black anodized
