

Built-in loudspeaker with program selection

HK-AV

Speaker with program selection, volume controller and 50V sound output transformer for hotel rooms, living rooms and bed rooms in senior-citizens homes and the like, where an amplification control center transmits various programs at the same time.

A maximum of 5 broadcasting programs can be selected by turning the left knob, volume is controlled by turning the right knob. The 24V relay is part of the standard fitting and permits an obligatory reception of a principal program for messages and alerts.
